2 recalls listed by Transport Canada for this model year

Brakes

2026071 18 Feb 2026

Issue: On certain vehicles, the cotter pin that secures the brake booster pushrod to the brake pedal may not have been installed. As a result, the pushrod could detach from the pedal and cause a loss of brakes. Note: This recall doesn't affect the Transit MPV model. Safety Risk: A loss of brakes can create the risk of a crash. Corrective Actions: To reduce the safety risk, Ford advises you not to drive your vehicle until the recall repairs are completed. Ford will notify owners by mail and advise you to contact a dealer to arrange for an inspection. The dealer will repair the brake booster assembly, as necessary.

Engine

2025284 23 May 2025

Issue: On certain vehicles, the connecting rods may not have been manufactured properly. As a result, the engine could fail. Note: This recall only affects certain vehicles equipped with a 3.5L engine. Safety Risk: An engine failure could cause a sudden loss of power to the wheels and increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the engine.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
