2 recalls listed by Transport Canada for this model year

Brakes

2025318 12 Jun 2025

Issue: On certain vehicles, the brake pedal assembly may not have been manufactured properly. As a result, the brake pedal could move and cause you not to be able to apply the brakes properly, or to apply the brakes unexpectedly. This could also cause the brake lights to turn on without pressing the brake pedal. Safety Risk: Reduced braking and/or braking unexpectedly could increase the risk of a crash. Additionally, brake lights that turn on without the brake pedal being pressed could cause others not to recognize when the vehicle is braking or not braking and increase the risk of a crash. Corrective Actions: The company will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the brake pedal assembly.

Fuel system

2025029 23 Jan 2025

Issue: On certain vehicles, a software problem in the fuel injection electronic control unit could cause the engine to stall while driving. Safety Risk: A sudden loss of power to the wheels could increase the risk of a crash. Corrective Actions: Honda will notify owners by mail and advise you to take your vehicle to a dealership to update the fuel injection electronic control unit software.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
