

The Value Book

What used vehicles are asking for sale in Canada, by make, model, model year and province. 254,699 used vehicles, 11 July 2026 to 9 October 2026.

Asking, not sold.

Dealer inventory. Every price is what a seller asked.

A quarter of a million used vehicles, priced **one row** at a time.

254,699

used vehicles of model years 2016 to 2026, offered for sale in Canada by 5,822 sellers in 90 days.

of 511,830 vehicles seen in the window, new and used

95.2%

of the used vehicles fall in a published row. The other 12,149 sit in rows too thin to price.

242,550 of 254,699

2,051 of 4,307

make, model and model-year rows published. A row needs 20 vehicles behind it, or it is left out.

368 model references · 38 makes

\$30,991

median asking price across every used vehicle in the window. Half asked more, half asked less.

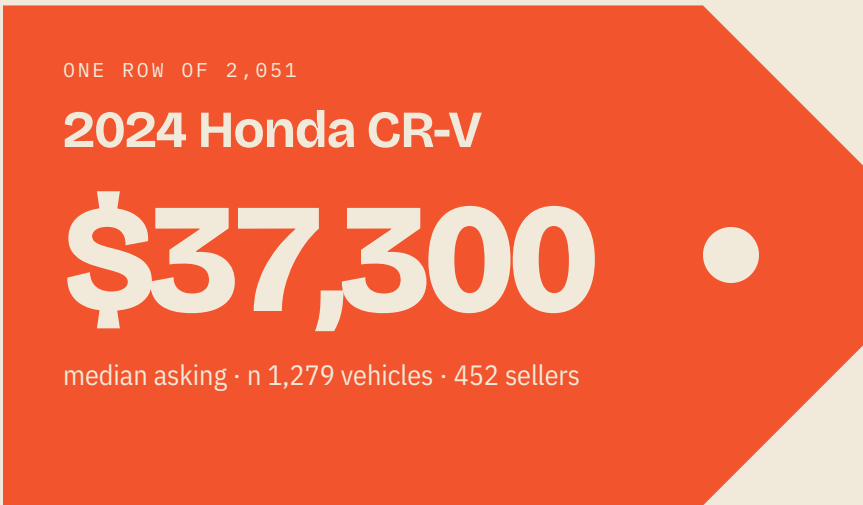

n 254,699 · run 9 October 2026

CONTENTS

How to read a row	3

Model year	5
Five years older	6
Provinces	7
One row, eight provinces	8
Makes	9
Method	10
What it is not	11
The book, 368 models	12

Asking, not sold. Every price in this book is what a seller asked for a vehicle in dealer inventory, on a dated day. It is not what the vehicle sold for. Private sales are not in it. Province is where the seller is.

Every row is a **tag**: one price, and the count behind it.

The row with the most vehicles behind it for this model. Window 11 July 2026 to 9 October 2026.

Median asking price

\$37,300

The published value. Half the vehicles in the row asked more, half asked less. A median, so one wild listing cannot move it.

Middle half

\$34,564 to \$39,999

The 25th to 75th percentile. Trim, options and condition live here: the book does not split rows by trim, because trim text on a listing is unreliable. The spread shows what trim does.

Vehicles

1,279

The denominator. One vehicle counts once, even when three sellers list it: the listing seen most recently in the window stands for it. Under 20, the row is not published.

Sellers

452

Distinct sellers behind the row, so a reader can see when one lot carries a row on its own.

Median odometer

48,676 km

What the vehicles in the row have driven, as listed.

Model reference

model:honda/cr-v

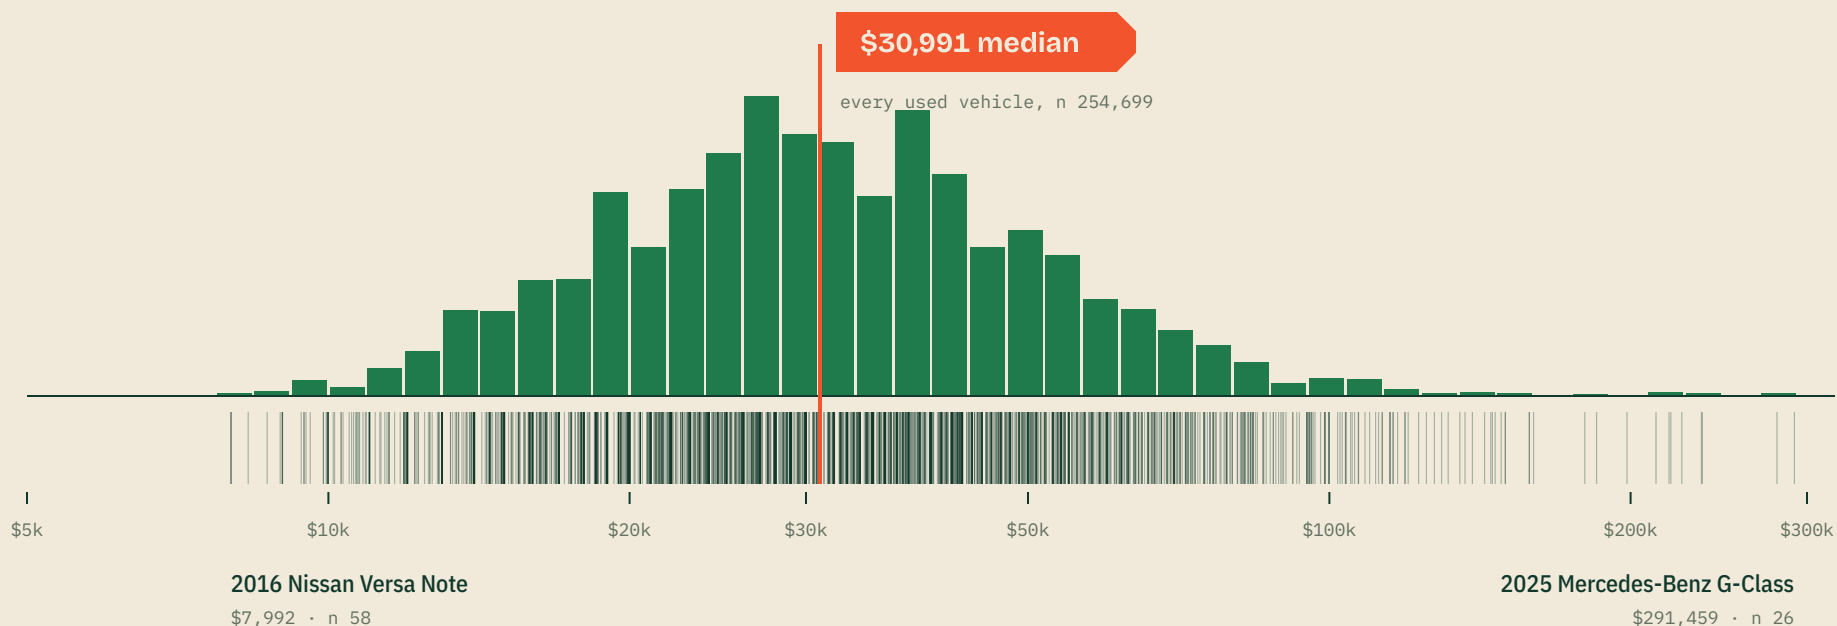

The key. Rows are grouped by the decoded VIN's canonical model, not by the seller's spelling.

Half of Canada's used vehicles ask less than **\$30,991**.

The 2,051 published rows run from \$7,992 for a 2016 Nissan Versa Note to \$291,459 for a 2025 Mercedes-Benz G-Class. The busiest band is \$25,000 to \$35,000: 27% of the vehicles in published rows sit in a row whose median falls there.

Vehicles in published rows, placed at their row's median asking price

■ vehicles, 242,550 | one tick per row, 2,051

Under \$15,000: 7%. \$15,000 to \$25,000: 26%.
\$25,000 to \$35,000: 27%. \$35,000 to \$50,000: 23%.
Over \$50,000: 17%. Shares of the 242,550 vehicles in published rows.

The scale is logarithmic, so equal distances are equal ratios. The barcode under the bars is the book itself, one tick for every row, so a thin stretch of ticks with tall bars is a few models carrying many vehicles.

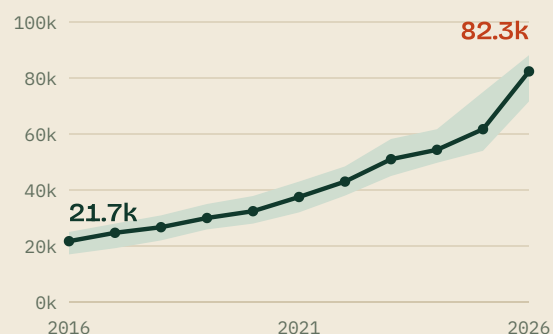

93,813 of the 254,699 used vehicles (37%) carry an earlier, higher asking price on record; the median step down from it was 2.5%. The book records the price last seen.

Six models, eleven model years, **one window.**

The six models with a published row in every model year from 2016 to 2026: Ford F-150, Honda CR-V, Ram 1500, Toyota RAV4, Nissan Rogue and Honda Civic. Together, 37,945 vehicles. The line is the median asking price, the shaded band the middle half.

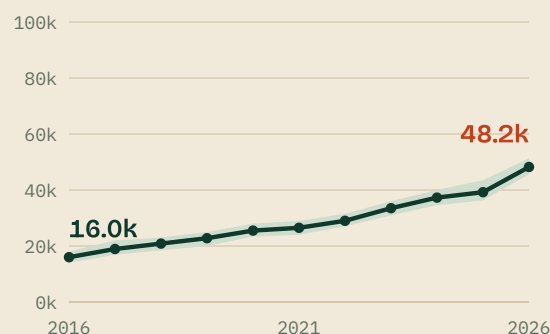

Ford F-150

n 7,243

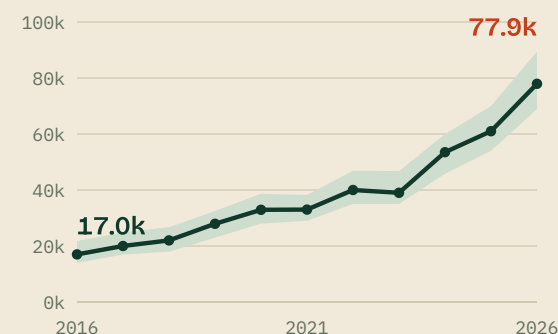

Honda CR-V

n 6,911

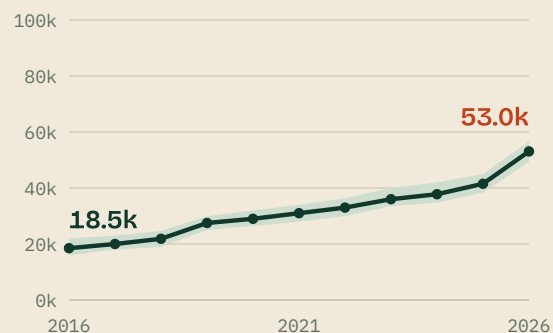

Ram 1500

n 6,616

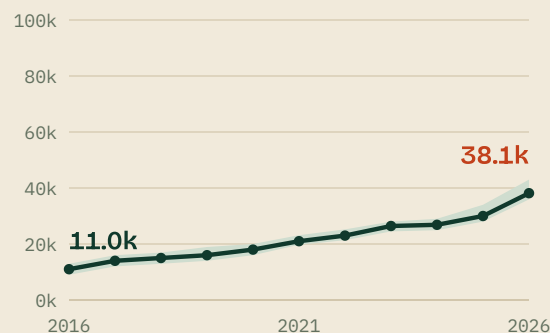

Toyota RAV4

n 5,933

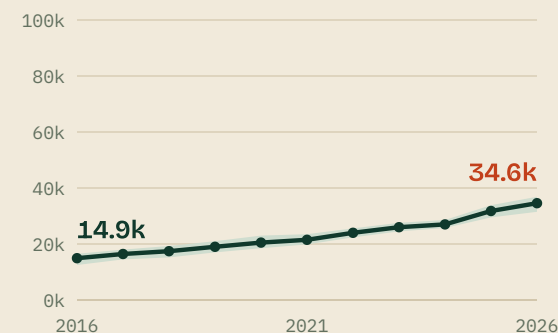

Nissan Rogue

n 5,804

Honda Civic

n 5,438

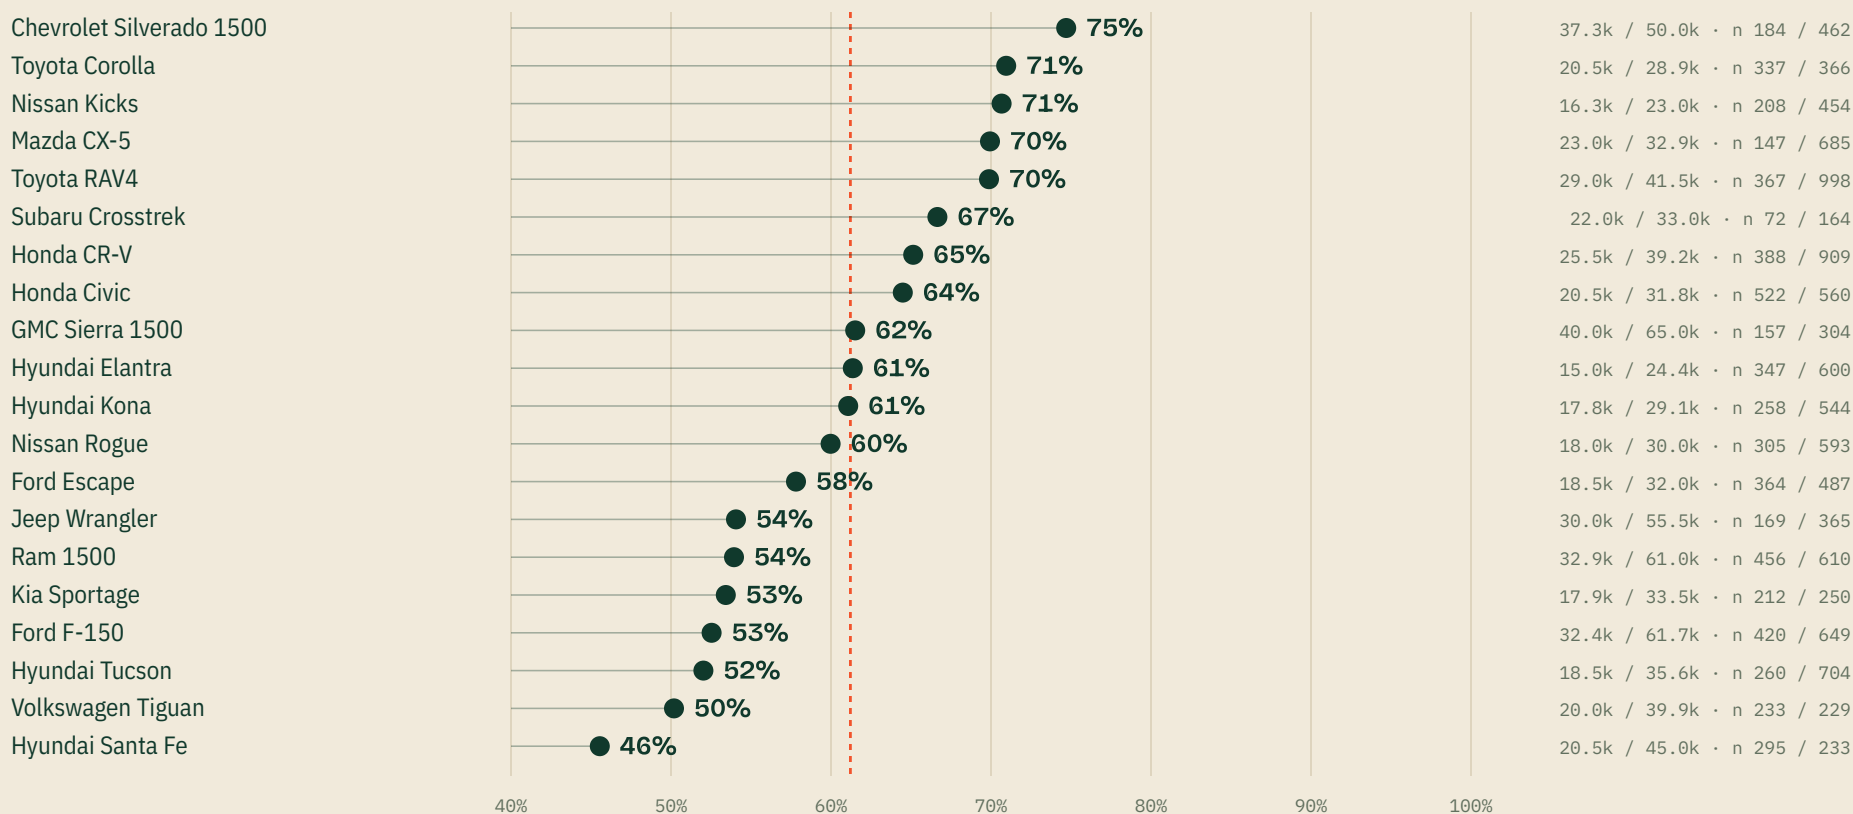

Asking prices, thousands of dollars, by model year, all observed in the same 90 days. This is a cross-section of the market, not the path of one vehicle's price over time.

A 2020 asks about **61%** of what a 2025 asks.

For the 20 highest-volume models with a published row in both model years, the 2020 row's median as a share of the 2025 row's. The middle of the 20 is 61%; Chevrolet Silverado 1500 holds most at 75%, Hyundai Santa Fe least at 46%.

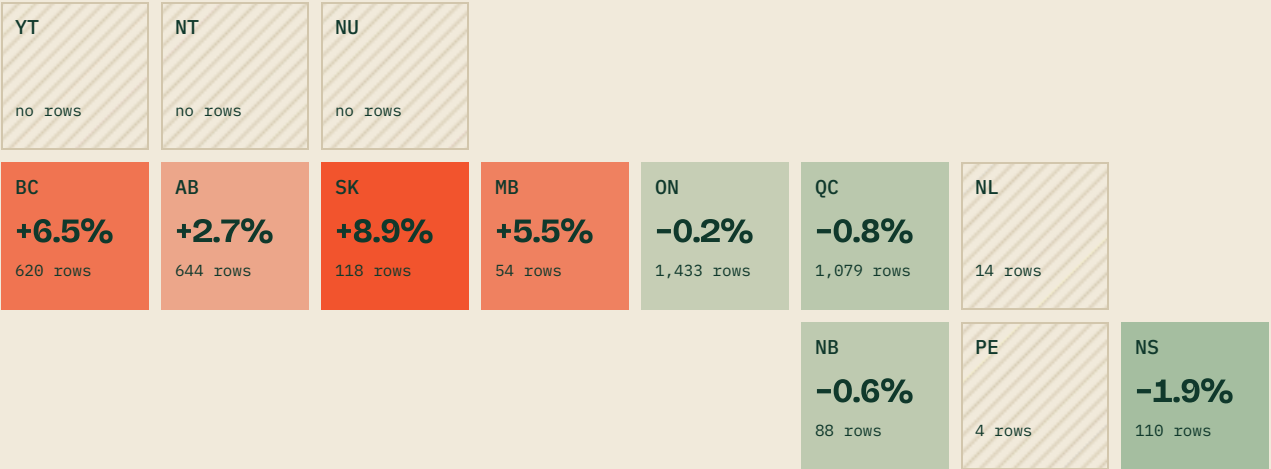

2020 median asking as a share of 2025 median asking, same model, same window

PROVINCES

Same model, same year: **the West asks more.**

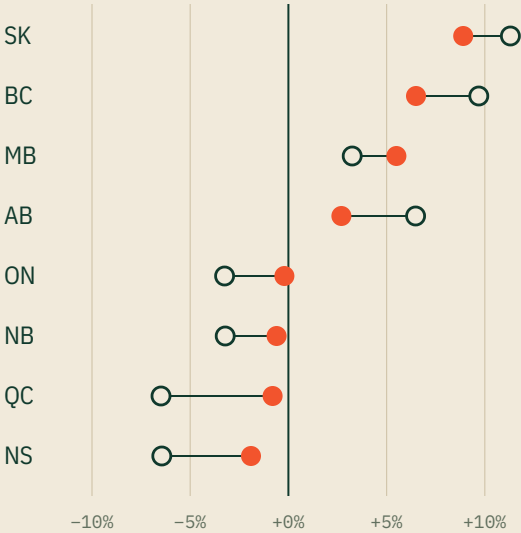

Like for like against the national row. Hatched: under 20 matched rows, not shown (Newfoundland and Labrador (14 rows) and Prince Edward Island (4 rows)); no rows for the territories. Province is the seller's address, resolved for 181,787 of 254,699 vehicles (71%).

Raw, Quebec's used vehicles ask a median \$28,982 (-6.5% against \$30,991, n 47,949). Like for like, -0.8%. Most of the raw gap is which vehicles are on the lot, not what each one asks. The right-hand chart shows the same split for every province with an index.

The province index compares like with like. For every row a province carries with at least 10 vehicles, it divides the provincial median by the national one, and takes the middle of those ratios. Saskatchewan asks +8.9% against the national row (118 rows, 2,182 vehicles), British Columbia +6.5% (620 rows, 14,508 vehicles). Ontario sits at -0.2% (1,433 rows) and Quebec at -0.8% (1,079 rows).

Raw median against like for like

○ all used, vs \$30,991 ● index

The rows that trade **everywhere**.

The 17 rows published in the most provinces, each with at least 20 vehicles in that province. Median asking price in thousands of dollars, with the count of vehicles. Red: 3% or more above the national row. Green: 3% or more below.

A dot means the province has fewer than 20 vehicles in that row: absent, never estimated.

The floor holds for volume makes and bites for luxury ones.

121 makes had at least one used vehicle listed in the window; 38 carry a published row. Ford has 98% of its used vehicles in a published row and Toyota 97%. BMW has 83% and Audi 83%. Their vehicles spread across many more model references (BMW 74, Audi 41, against Toyota's 36), which leaves more rows under 20.

The 20 makes with the most used vehicles: share in a published row

How the book is counted.

01 The unit

One vehicle, by VIN. When several listings carry the same VIN, the one seen most recently in the window stands for it. 254,699 used vehicles, of 511,830 seen.

04 The grain

Make, model and model year, keyed on the decoder's canonical model reference, not the seller's spelling. Where two references share a name, the reference is shown in brackets. Trim is not a grain.

07 Province

From the seller's address, resolved for 71% of vehicles. A provincial row is published where the province alone has 20 vehicles in it. The index uses rows with 20 nationally and 10 in the province.

02 The window

90 days: 11 July 2026 to 9 October 2026. A vehicle is in the window if its listing was seen live in it. The run of record is 2026-10-09T03:27Z.

05 The statistics

Median asking price (the published value), 25th and 75th percentile, median odometer, the count of vehicles and the count of distinct sellers.

08 The source

Cardog's listing record: dealer, aggregator and auction listings in Canada, read daily, each VIN decoded by Cardog's decoder. Private-party listings are effectively absent.

03 The population

VIN decoded and verified. Price in Canadian dollars, between \$2,000 and \$500,000. Model years 2016 to 2026. Used: the seller says used, or the odometer reads 1,000 km or more.

06 The floor

A row with fewer than 20 vehicles is not published. It is absent, never estimated. 2,051 of 4,307 rows clear it, holding 95.2% of the vehicles.

09 No hand-typed numbers

Every figure in these pages is computed by one script from the edition's files. The national median is taken over every used vehicle, not over the rows.

A retail asking book, and **only** that.

It is not a sold price. Every value is what a seller asked. A vehicle can sell for less, or more. The record does not yet hold enough transaction prices to publish a sold or wholesale value honestly, so this edition does not publish one.

It is not the private market. The listings are dealer, aggregator and auction inventory. A private sale between neighbours is not in the book.

It is not one vehicle's value. A row is a model year across trims and conditions. The middle half shows how wide that is.

Province is the seller. A vehicle listed in Alberta counts for Alberta, wherever it ends up registered.

Coverage is observed, not claimed. A make with no used listing in the window has no row. It gets one the day it trades in enough numbers, counted the same way.

The next edition is counted with the same method on a new 90-day window, so a change in a value is a change in the market, not in the method. Past editions stay as published.

The Cardog Value Book. Canada, Edition 1.

254,699 used vehicles offered for sale in Canada, 11 July 2026 to 9 October 2026.
2,051 rows of make, model and model year, each with 20 or more vehicles behind
it. Run of record 2026-10-09T03:27Z.

Asking, not sold. Dealer inventory. Province is the seller's location. A row under 20
vehicles is absent, never estimated.

Published by Cardog Inc., Newmarket, Ontario. cardog.app
