1 recall listed by Transport Canada for this model year

Suspension 2009263 11 Sep 2009

On certain vehicles, the metal upper strut insulators may have been manufactured incorrectly and, as a result, could fail. In the worse case this could allow the strut rod to come out of its mounting position, adversely affecting vehicle handling. This could result in a vehicle crash causing property damage, personal injury or death. Correction: Dealers will replace the front strut insulators.
