Issue: On certain vehicles, if the tire repair kit nozzle is not properly attached to the tire valve, pressure could build up in the sealant bottle. As a result, excessive pressure could cause the bottle cap to detach. Safety Risk: If the bottle cap detaches, it could increase the risk of injury. Corrective Actions: Honda will notify owners by mail and advise you to take your vehicle to a dealership to replace the nozzle on the tire repair kit. If the sealant bottle has been previously used, it will be replaced.
