Issue: On certain vehicles, the high-pressure fuel pump could fail. If this happens, the engine may run rough and the check engine light may turn on. This could also cause a sudden loss of engine power while driving. Note: This recall only affects certain vehicles equipped with a 6.7 L diesel engine. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the powertrain control module software.
