**2** recalls listed by Transport Canada for this model year

### Brakes — 2009313 — 29 Oct 2009

On certain vehicles, an incorrectly manufactured brake master cylinder may allow brake fluid to slowly leak into the brake booster assembly. Brake fluid leakage could ultimately result in a reduction of braking capability, which could increase the vehicle's stopping distance and cause a crash with personal injury or death. Correction: Dealers will inspect and, if required, replace the brake master cylinder assembly.

### Airbag — 2009125 — 27 Apr 2009

On certain vehicles, one or both of the side curtain airbags may have been incorrectly positioned during vehicle assembly. If this occured, in certain types of crashes where side curtain airbag deployment is expected, a portion of the bag may be restricted from fully deploying. The side curtain airbag will still timely deploy, meet and exceed applicable safety standards. Correction: Dealers will inspect and, if necessary, reposition the curtain airbag. This action is deemed a voluntary service campaign and is not being conducted under the Motor Vehicle Safety Act.

## STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
