2 recalls listed by Transport Canada for this model year

Seats and restraints

2026266 1 Jun 2026

Issue: On a small number of vehicles, the bolts that attach the rear passenger seat belt may not have been properly tightened. As a result, the seat belts could loosen or detach in a crash. Safety Risk: A seat belt that detaches in a crash could increase the risk of injury. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, tighten the rear seat belt attachment bolts.

Airbag

2026147 27 Mar 2026

Issue: On certain vehicles, the wrong fabric may have been used for the passenger-front airbag cushion. As a result, the passenger-front airbag may not inflate properly in a crash. Safety Risk: An airbag that does not inflate properly could increase the risk of injury in a crash. Corrective Actions: To reduce the safety risk, Mercedes-Benz recommends that you shouldn't transport a passenger in the front passenger seat until the recall repairs have been completed. Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealer to replace the passenger-front airbag.
