4 recalls listed by Transport Canada for this model year

Lights and instruments

2017051 3 Feb 2017

Certain vehicles may fail to comply with the requirements of Canada Motor Vehicle Safety Standard 108 - Lighting System and Retroreflective Devices. The headlamp high-beam lens is not marked with the bulb type, contrary to the requirements of the standard. Correction: An manufacturing change has been undertaken to prevent this non-compliance condition from continuing. No corrective recall action is required as the non-compliance condition is deemed to be non-safety related.

Electrical

2016191 28 Apr 2016

Certain vehicles equipped with a "Bring Your Own Media" (BYOM) radio may fail to conform to Canada Motor Vehicle Safety Standard (CMVSS) 114 - Theft Protection and Rollaway Protection. The radio software may fail to provide an audible warning/reminder chime that meets the requirements of the standard if the ignition key is left in the off position and the driver delays opening the driver's door for more than 10 minutes, or opens and closes the door several times. The loss of an audible warning when a key is left in the ignition may increase the risk of vehicle theft. Correction: Dealers will reprogram the radio with corrected operating software.

Airbag

2014382 9 Sep 2014

On certain vehicles, a loss of electrical connection in the steering column may prevent the second stage of the driver's front airbag from deploying in crash events where second stage deployment is warranted. This could increase the risk of injury to the driver. Correction: Dealers will test the terminals in the clock spring connector, and any loose terminals found will be replaced.

Accessories

2014274 3 Jul 2014

On certain vehicles, insulation on the engine block heater power cord may become damaged if the cord is handled during very cold days (temperatures below -25C). This could create an electrical shock hazard, which could result in personal injury. Correction: Dealers will replace the block heater cord.
