Issue: On certain vehicles, a problem with the rearview camera connector could cause distortion or flickering of the rearview camera image. Note: This recall only affects hatchback (5-door) models. Safety Risk: A rearview camera image that doesn't display correctly could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Mazda will notify owners by mail and advise you to take your vehicle to a dealership to inspect the rearview camera and install a seal for the wiring harness. The dealer will replace the rearview camera, if necessary.

On certain vehicles, the anti-corrosion treatment of the outer tube of the rear lift gate stay may be insufficient. Over time, the outer tube of the rear lift gate stay may corrode and break off, which could increase the risk of injury. Correction: Dealers will replace both rear door stays.

Suspension

On certain vehicles, the nut and bolt holding the strut assembly to the knuckle may not have been tightened properly during the manufacturing process. Over time, this could cause the strut assembly to separate from the knuckle, resulting in a loss of steering control which would increase the risk of a crash causing injury and/or damage to property. Correction : Dealers will inspect and replace the nut and bolt holding the strut assembly to the knuckle if found loose.
