1 recall listed by Transport Canada for this model year

**Structure** 2022711 14 Dec 2022

Issue: On a small number of vehicles, the front bumper impact bar may not be welded correctly. As a result, the front crash sensors may not work properly. This could cause the airbag system not to work properly in a crash. Safety Risk: Airbags that do not work properly could create an increased risk of injury in a crash. Corrective Actions: General Motors will notify owners by mail and instruct you to take your vehicle to a dealership to inspect the welds on the front bumper impact bar.

Listed for the model year, not checked against your VIN. Chevrolet confirms which apply.
