**2** recalls listed by Transport Canada for this model year

### Fuel system

2016396 10 Aug 2016

On certain vehicles equipped with a 2.0 litre turbocharged engine, the fuel line assembly may not have been routed properly due to a manufacturing error. This could cause the fuel lines to contact hot surfaces which could, over time, degrade the fuel lines and cause a leak. A fuel leak in the presence of an ignition source could result in a fire causing injury and/or damage to property. Correction : Dealers will replace the fuel line assembly.

### Powertrain

2016341 30 Jun 2016

Certain vehicles may fail to conform to Canada Motor Vehicle Safety Standard (CMVSS) 114 - Theft Protection and Rollaway Prevention. The Electronic Park Lock (EPL) lever in the steering column electrical assembly may have been damaged during manufacturing. As a result, the ignition key could be removed when the vehicle's transmission is in a position other than park. This could cause unintended vehicle movement, increasing the risk of injury and/or property damage. Correction: Dealers will inspect the vehicle and, if necessary, replace the key cylinder lock housing.
