1 recall listed by Transport Canada for this model year

Wheels

2026232 14 May 2026

Issue: This recall is for certain vehicles equipped with 24-inch wheels that had a dealer-installed accessory brake package or had the front hubs replaced during service. On certain vehicles, the wrong bolts may have been used during installation of the accessory brake package or during service or replacement of the front wheel hub bearings. As a result, the bolts could loosen and cause poor handling and a loss of control. Additionally, this could cause the front wheel(s) to separate from the vehicle. Safety Risk: A loss of control could create the risk of a crash. A wheel that separates could create a road hazard for others. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to replace the front left and right wheel hub bolts.
