**2** recalls listed by Transport Canada for this model year

### Wheels

2026232 14 May 2026

Issue: This recall is for certain vehicles equipped with 24-inch wheels that had a dealer-installed accessory brake package or had the front hubs replaced during service. On certain vehicles, the wrong bolts may have been used during installation of the accessory brake package or during service or replacement of the front wheel hub bearings. As a result, the bolts could loosen and cause poor handling and a loss of control. Additionally, this could cause the front wheel(s) to separate from the vehicle. Safety Risk: A loss of control could create the risk of a crash. A wheel that separates could create a road hazard for others. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to replace the front left and right wheel hub bolts.

### Other

2026086 26 Feb 2026

Issue: On certain vehicles, the owner's manual may be missing. As a result, the vehicles may not meet certain requirements of Canadian regulations. Note: For the Escalade model, the recall also affects certain 2026 model year Escalade IQ and Escalade IQL models. Safety Risk: A missing owner's manual could cause confusion on how to safely operate the vehicle and increase the risk of injury or a crash. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to install the owner's manual.
