2 recalls listed by Transport Canada for this model year

Fuel system 2018479 6 Sep 2018

Certain vehicles may have been built with a defective fuel tank crossover pipe connecting the left and right tanks. Over time, the crossover pipe could separate and cause a fuel leak which, in the presence of an ignition source, could create the risk of a fire causing injury and/or damage to property. Correction: The company will replace affected fuel tanks.

Electrical 2018478 6 Sep 2018

Certain vehicles were equipped with a center high-mount stop light assembly that could short circuit and cause a loss of brake lights. This could increase the risk of a crash causing injury and/or damage to property. In addition, a vehicle with this condition cannot be restarted once it is turned off. Correction: The company will replace the center high-mount stop light assembly.
