§2 OBLIGATIONS [2]

cardog.app/tools/recalls/ford/bronco/2021

23 recalls listed by Transport Canada for this model year

Electrical

2026356 20 Jul 2026

Issue: On certain vehicles, the engine wiring harness may not have enough protection and could become damaged by contact with surrounding components. As a result, the wiring harness could short circuit. Safety Risk: A short circuit can create the risk of a fire. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to install additional protection on the engine wiring harness. The dealer will also repair or replace the engine wiring harness, as necessary.

Structure

2026229 12 May 2026

Issue: On certain vehicles, the hard top roof panels may not have been manufactured properly. As a result, sections of the exterior panels could separate and detach from the vehicle while driving. Note: This recall only affects certain vehicles equipped with a molded-in-colour hard top. Safety Risk: A section of roof that detaches from the vehicle could create a hazard for others and increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the hard top.

Powertrain

2026188 15 Apr 2026

Issue: On certain vehicles, the transmission may not have been reassembled properly after service. As a result, the transmission output shaft splines and/or the transfer case input splines could wear and fail. If this happens, there could be a loss of power to the wheels, or the vehicle could move when it's parked and the parking brake isn't used. Safety Risk: A loss of power to the wheels could increase the risk of a crash. A parked vehicle that rolls away could create the risk of an injury or a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the transmission and transfer case.

Visual system

2026093 3 Mar 2026

Issue: Under certain conditions, the infotainment system could overheat. As a result, the rearview camera image may not display when the transmission is shifted into reverse. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the accessory protocol image module (APIM) software.

Electrical

2026005 9 Jan 2026

Issue: On certain vehicles, the engine block heater could leak coolant. If this happens, the block heater could short circuit when it's plugged in. Note: This recall replaces Transport Canada recall no. 2025-554. Vehicles that were repaired under that recall don't require this repair. Safety Risk: A short circuit can create the risk of a fire. Corrective Actions: To reduce the safety risk, Ford advises you not to use the engine block heater until the recall repairs have been completed. Ford will notify owners by mail and advise you to take your vehicle to a dealership to replace the block heater. Alternatively, owners can choose to have the dealership permanently disable the engine block heater.

Seats and restraints

2025585 24 Oct 2025

Issue: On certain vehicles, the pivot bolts in the height adjuster assembly for the front seats may not have been manufactured properly. As a result, the bolt(s) could loosen and detach. If this happens, the seat(s) could move in a crash. Safety Risk: A seat that moves in a crash could increase the risk of injury. Corrective Action: Ford will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the height-adjust link(s) and pivot bolts.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same configuration, 13 live listings, as of 28 Oct 2026

[5] Live public dealer listings on Cardog, as of 28 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
