1 recall listed by Transport Canada for this model year

**Suspension** 2024368 27 Jun 2024

Issue: On certain vehicles, the right-front lower control arm may not have been manufactured properly. As a result, the ball joint could become loose. Over time, this could cause the control arm to corrode and the ball joint to separate. Safety Risk: A ball joint that separates could cause a loss of control and increase the risk of a crash. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to replace the right-front lower control arm.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.
