**3** recalls listed by Transport Canada for this model year

### Brakes

2026417 1 Sep 2026

Issue: On certain vehicles, a problem with the brake pedal position sensor could cause the electronic stability control (ESC) system not to work. Note: This problem would cause the electronic stability control (ESC) warning light to turn on. Safety Risk: An electronic stability control system that doesn't work could increase the risk of a crash. Corrective Actions: FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the brake pedal position sensor.

### Visual system

2026396 13 Aug 2026

Issue: On certain vehicles, a software problem could cause the rearview camera image not to display when the transmission is shifted into reverse. Canadian regulations require the rearview image to display when the vehicle is reversing. Note: This recall also affects Grand Cherokee L models and Grand Wagoneer L models. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: FCA Canada will notify owners in writing and send a wireless over-the-air software update to eligible vehicles to update the radio software. Alternatively, you may schedule an appointment to have the update performed at an FCA dealership.

### Seats and restraints

2026141 26 Mar 2026

Issue: On certain vehicles, the side curtain airbag(s) may not have been manufactured properly. As a result, the airbag(s) may not inflate properly in a crash. Note: This is an expansion of Transport Canada recalls 2025-291 and 2025-454. Safety Risk: A side curtain airbag that doesn't work properly could increase the risk of injury in a crash. Corrective Actions: FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to replace the side curtain airbag(s), as necessary.
