2 recalls listed by Transport Canada for this model year

Airbag 2016448 14 Sep 2016

On certain vehicles in certain types of crashes, airbag and seatbelt pretensioner deployment capability may be lost due to a short in the front impact sensor wiring affecting Occupant Restraint Controller function. Failure of airbags and seatbelt pretensioners to deploy in a crash (when warranted) could increase the risk of injury. Correction: Dealers will replace the Occupant Restraint Controller module.

Other 2010152 10 May 2010

Certain vehicle may have been built with an incorrect door lock rod in the right front door, which could unlatch the door when the window is rolled down. If the window is rolled down while driving and the lock rod unlatched the door, it could result in a crash causing property damage, personal injury or death. Correction: Dealers will inspect and if necessary replace the right door lock rod.
