3 recalls listed by Transport Canada for this model year

Brakes — 2018461 — 30 Aug 2018

On certain vehicles, a problem with the rear brake system may cause gas bubbles to form in the brake fluid. This could cause a soft brake pedal feel and a reduction in brake performance, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will bleed the rear brakes.

Fuel system — 2018289 — 1 Jun 2018

On certain vehicles, a joint on the high-pressure fuel pump may have been improperly welded during the manufacturing process. Over time, this could cause the weld to crack and create a potential fuel leak. A fuel leak in the presence of an ignition source could increase the risk of fire, causing injury and/or damage to property. Correction: Dealers will replace the high-pressure fuel pump and high-pressure fuel pipe.

Visual system — 2018196 — 19 Apr 2018

Certain vehicles fail to comply with the requirements of CMVSS 205 - Glazing Materials. The glass manufacturer may have failed to fully temper the front door window glass during the manufacturing process. If broken, improperly tempered glass could shatter into large fragments, which could increase the risk of injury. Correction: Dealers will replace the left and right front door glass.
