1 recall listed by Transport Canada for this model year

Other

2008371 10 Oct 2008

On certain vehicles, a broken solder joint on the printed circuit board of the Power Control Module (PCM) can affect the fuel pump relay performance and potentially result in an engine stall while driving and/or a no start of the engine. Engine stalling would result in lost propulsion which, in conjunction with traffic and road conditions, and the driver's reactions, could increase the risk of a crash. Correction: Dealers will replace the PCM.
