cardog.app/tools/recalls/lincoln/nautilus/2019

3 recalls listed by Transport Canada for this model year

Visual system

2025360 27 Jun 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to display when the transmission is shifted into reverse. Canadian regulations require the rearview image to display when the vehicle is reversing. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the SYNC software.

Seats and restraints

2020335 20 Jul 2020

Issue: On certain vehicles, the wiring for the front seats could be damaged when a person uses the tilt function. As a result, certain system in the vehicle may not work properly. Depending on which wires are damaged, the occupant classification system may not work properly. This can cause the passenger airbag to not work properly in a crash. The damage could also cause the driver or passenger front airbag to deploy suddenly without a crash. Note: This recall only affects vehicles equipped with 16-way power front seats. Safety Risk: An airbag that does not deploy properly in a crash could increase the risk of injuries. A sudden airbag deployment when there is no crash could also create a risk of injury. Corrective Actions: Ford will notify owners by mail and instruct you to take your vehicle to a dealer to install protective tape on the exposed edge of the cushion frames. The dealer will also inspect the wire harness and repair or replace it, as needed.

Steering

2019017 14 Jan 2019

Issue: Certain vehicles may not detect when the driver removes their hands from the steering wheel while using adaptive cruise control with lane centering. If this occurs, the driver may not be alerted by warnings to hold the steering wheel. This system is not designed for hands-free operation. Safety Risk: A driver may not be warned to put their hands back on the steering wheel, which could increase the risk of a crash. Corrective Actions: The company will notify owners by mail. Owners will be instructed to take their vehicle to a Ford or Lincoln dealer for an update of the software for the Power Steering Control Module.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same configuration, 13 live listings, as of 28 Oct 2026

[5] Live public dealer listings on Cardog, as of 29 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
