### 3 recalls listed by Transport Canada for this model year

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| Label                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 2024548 15 Aug 2024 |
| Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.                                                                          |                     |
| Engine                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 2018269 17 May 2018 |
| On certain vehicles, an electronic fault may create a situation where the cruise control cannot be deactivated. If this occurs and the driver does not apply the brakes or shift the transmission to neutral, the vehicle could maintain speed or accelerate without warning, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will inspect the Powertrain Control Module (PCM) software and perform an update as necessary. Note: In the interim, owners are advised not to use the cruise control until the vehicle is repaired. |                     |
| Suspension                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 2016392 10 Aug 2016 |
| On certain vehicles, the suspension fastener torque and/or tightening angle may not have been verified at time of assembly. If fasteners were improperly tightened, they may become loose and fatigue over time or fall out, which could affect vehicle handling and increase the risk of a crash causing injury and/or property damage. Correction: Dealers will inspect the suspect fasteners and replace or tighten them to specification as necessary.                                                                                                                     |                     |

Listed for the model year, not checked against your VIN. Chrysler confirms which apply.

Check your VIN with Mopar Canada or call a Chrysler dealer with your VIN.

**STATEMENT OF SCOPE**

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
