Body	Sedan	Plant	Sterling Heights, Michigan, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/dodge/avenger/2013

6 recalls listed by Transport Canada for this model year

Other 2019420 21 Aug 2019

Issue: This recall is for aftermarket replacement rear window glass produced by Vitro Automotriz. Certain rear window glass may not have been properly tempered. If the window breaks, the glass may separate into large pieces instead of very small ones. Note: This is a voluntary recall that is not being conducted under the requirements of the Motor Vehicle Safety Act. Safety Risk: Glass that breaks in to large pieces could create a risk of injury. Corrective Actions: The company will notify consumers by mail and instruct them to inspect the designation code marked on the rear window glass. Products affected by this recall have the designation "DOT 287" along with the lettering "VMR" (Replacement Market) and a date code that is before July 2019. This information is printed on the bottom corner of the glass. Consumers should contact Vitro's customer service at 1-412-995-6457 or argbacklites@vitro.com to arrange for replacement of the glass.

Airbag 2017494 12 Oct 2017

On certain vehicles, there could be an electrical condition within the Occupant Restraint Control ("ORC") module. This may result in the airbag warning lamp illuminating, and the active head restraints not to deploy during certain rear impact collisions, which could increase the risk of injury to front seat occupants. Correction: Dealers will inspect the ORC part number and replace the ORC if necessary. Note: Vehicles that have been previously repaired with the updated ORC under recall 2016-448 will not require repairing under this recall campaign.

Airbag 2016448 14 Sep 2016

On certain vehicles in certain types of crashes, airbag and seatbelt pretensioner deployment capability may be lost due to a short in the front impact sensor wiring affecting Occupant Restraint Controller function. Failure of airbags and seatbelt pretensioners to deploy in a crash (when warranted) could increase the risk of injury. Correction: Dealers will replace the Occupant Restraint Controller module.

Engine

2013394 7 Nov 2013

Certain vehicles equipped with a 2.4L gasoline engine may experience a loss of engine oil pressure and subsequent engine failure, causing a loss of motive power. A loss of motive power, in conjunction with driving conditions and driver reactions, could increase the risk of a crash. Correction: Dealers will replace the balance shaft module.

Airbag

2013231 4 Jul 2013

On certain vehicles, the airbag warning lamp may illuminate due to an electrical fault within the Occupant Restraint Control (ORC) module. As a result, the Active Head Restraints (AHR) may not deploy during a rear impact collision (where deployment is warranted), which could increase the risk of personal injury to the front seat occupants. Correction: Dealers will reprogram the Totally Integrated Power Module (TIPM) or replace the ORC module, as required.

Fuel system

2013042 6 Feb 2013

Certain vehicles may experience fuel leakage or engine stall due to a broken control valve in the fuel tank assembly. Engine stalling would result in lost vehicle propulsion which, in conjunction with traffic and road conditions, and the driver's reactions, could increase the risk of a crash. Fuel leakage, in the presence of an ignition source, could result in a fire. These issues could result in property damage and/or personal injury. Correction: Dealers will inspect the control valve in the fuel tank. If the control valve is damaged, the fuel tank assembly and vapour canister will be replaced.

Listed for the model year, not checked against your VIN. Dodge confirms which apply.

Check your VIN with Mopar Canada or call a Dodge dealer with your VIN.

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 6 live listings, as of 27 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [5] Live public dealer listings on Cardog, as of 27 Oct 2026 |
| [3] NHTSA recall records (United States), listed for the model year | |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
