Trim	LT	Maker	GENERAL MOTORS LLC
Body	Sedan	Plant	Orion, Michigan, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/chevrolet/sonic/2013

7 recalls listed by Transport Canada for this model year

Airbag

2023412 27 Jul 2023

Issue: On certain vehicles, the driver-front airbag inflator could rupture when the airbag deploys in a crash. If this happens, the airbag may not properly inflate and fragments could be propelled toward vehicle occupants. Safety Risk: An airbag inflator that ruptures can create a risk of injury or death. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to replace the driver-front airbag module.

Lights and instruments

2017051 3 Feb 2017

Certain vehicles may fail to comply with the requirements of Canada Motor Vehicle Safety Standard 108 - Lighting System and Retroreflective Devices. The headlamp high-beam lens is not marked with the bulb type, contrary to the requirements of the standard. Correction: An manufacturing change has been undertaken to prevent this non-compliance condition from continuing. No corrective recall action is required as the non-compliance condition is deemed to be non-safety related.

Electrical

2016191 28 Apr 2016

Certain vehicles equipped with a "Bring Your Own Media" (BYOM) radio may fail to conform to Canada Motor Vehicle Safety Standard (CMVSS) 114 - Theft Protection and Rollaway Protection. The radio software may fail to provide an audible warning/reminder chime that meets the requirements of the standard if the ignition key is left in the off position and the driver delays opening the driver's door for more than 10 minutes, or opens and closes the door several times. The loss of an audible warning when a key is left in the ignition may increase the risk of vehicle theft. Correction: Dealers will reprogram the radio with corrected operating software.

Accessories

2014274 3 Jul 2014

On certain vehicles, insulation on the engine block heater power cord may become damaged if the cord is handled during very cold days (temperatures below -25C). This could create an electrical shock hazard, which could result in personal injury. Correction: Dealers will replace the block heater cord.

Lights and instruments

2013356 16 Oct 2013

On certain vehicles, the brake lamps could flash intermittently without the brake pedal being depressed. This would convey a confusing message to following road users who, in turn, may not react in a timely manner when the driver does apply the brakes. As such, this could result in a crash causing property damage and/or personal injury. Correction: Dealers will reprogram the Body Control Module. Note: This recall supersedes 2013-176.

Fuel system

2013334 27 Sep 2013

On certain vehicles, a fuel tank support strap bracket may have been welded incorrectly and could separate. This could potentially result in damage to the fuel tank and fuel leakage. Fuel leakage, in the presence of an ignition source, could result in a fire causing injury and/or property damage. Correction: Dealers will inspect the bracket and replace if necessary.

§5 DOCUMENTS

Window sticker — This VIN reads as model year 1983 or 2013, before our coverage for this manufacturer.

SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] NHTSA recall records (United States), listed for the model year
[4] Cardog market quote, same model year, 3 live listings, as of 28 Oct 2026
[5] Live public dealer listings on Cardog, as of 28 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
