2 recalls listed by Transport Canada for this model year

Electrical — 2016292 — 8 Jun 2016

Certain vehicles equipped with a "Bring Your Own Media" (BYOM) radio may fail to conform to Canada Motor Vehicle Safety Standard (CMVSS) 114 - Theft Protection and Rollaway Protection and CMVSS 208 - Occupant Protection in Frontal Impacts. The radio software may fail to provide an audible warning/reminder chime that meets the requirements of the standard when the key is left in the ignition and the driver door is opened, or when the driver fails to fasten their seatbelt. This can sometimes occur when the driver turns the ignition off with the headlamp or hazard warning flashers on and then restarts the vehicle while the radio is going through the “sleep” sequence. The loss of an audible warning when a key is left in the ignition may increase the risk of vehicle theft, and may fail to alert the driver that he or she is unbelted, increasing the risk of injury to the driver in a crash. Correction: Dealers will reprogram the radio with corrected operating software. Note: This recall involves vehicles that were previously repaired under recall 2016-191 that now require re-inspection and repair.

Electrical — 2016191 — 28 Apr 2016

Certain vehicles equipped with a "Bring Your Own Media" (BYOM) radio may fail to conform to Canada Motor Vehicle Safety Standard (CMVSS) 114 - Theft Protection and Rollaway Protection. The radio software may fail to provide an audible warning/reminder chime that meets the requirements of the standard if the ignition key is left in the off position and the driver delays opening the driver’s door for more than 10 minutes, or opens and closes the door several times. The loss of an audible warning when a key is left in the ignition may increase the risk of vehicle theft. Correction: Dealers will reprogram the radio with corrected operating software.
