9 recalls listed by Transport Canada for this model year

Airbag

2025613 6 Nov 2025

Issue: On a small number of vehicles, the steering column control module may not have been manufactured properly. As a result, the driver-front airbag may not inflate in a crash. Note: This problem would cause the airbag warning light to turn on. Safety Risk: An airbag that is turned off could increase the risk of injury in a crash. Corrective Actions: FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to replace the steering column control module.

Label

2024548 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Electrical

2023026 9 Feb 2023

Issue: On certain trucks and chassis-cabs equipped with a 6.7 L Cummins diesel engine, the intake air heater relay could short circuit. This could happen even when the vehicle is parked, and the ignition switch is in the off position. Safety Risk: A short circuit could create a fire risk. Corrective Actions: FCA Canada will notify owners by mail and instruct you to take your vehicle to a dealership to replace the intake air heater relay. FCA recommends that you should park your vehicle outside and away from other vehicles or buildings until the recall repairs are completed.

Powertrain

2022644 10 Nov 2022

Issue: On certain trucks, a buildup of heat and pressure inside the transmission could cause fluid to leak from the transmission dipstick tube. Note: This recall only affects trucks equipped with a Cummins 6.7 L diesel engine and a 68RFE automatic transmission. Safety Risk: A transmission fluid leak could create the risk of a fire. Corrective Actions: FCA Canada will notify owners by mail and instruct you to take your vehicle to a dealership to replace the transmission dipstick and vent assembly.

Brakes

2022108 11 Mar 2022

Issue: On certain vehicles, the warning lamp for the electronic stability control (ESC) system may not turn on when there is a problem with the ESC system. Safety Risk: A driver that is not aware of a problem with the ESC system could have an increased risk of a crash. Corrective Actions: FCA Canada will notify owners by mail and instruct you to take your vehicle to a dealer to update the antilock brake system (ABS) control module software.

Airbag

2021722 24 Nov 2021

Issue: On certain trucks, there may be a problem with the side airbag curtain inflators. As a result, the side airbag curtains may not inflate properly in a crash. Safety Risk: A side airbag curtain that does not inflate properly could increase the risk of injury in a crash. Corrective Actions: FCA Canada will notify owners by mail and instruct you to take your vehicle to a dealer to inspect and replace the side curtain airbag assemblies, as necessary.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
