3 recalls listed by Transport Canada for this model year

Fuel system

2025429 21 Aug 2025

Issue: On certain vehicles, fuel could spill in the fuel filler pocket when refueling. As a result, fuel could leak onto the left-side radiator and fan assembly. If this happens, the fuel could contact hot surfaces in the engine compartment. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to install a shield to divert spilled fuel.

Seats and restraints

2024326 6 Jun 2024

Issue: Under certain conditions, the driver and/or passenger seat belt(s) could remain locked after use. If this happens, the driver and/or passenger may not be able to use the seat belt(s). Note: These parts that may have been installed on new vehicles or sold as an accessory part through General Motor dealerships. Safety Risk: Not wearing a seat belt can increase the risk of injury in a crash. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to replace the driver and/or passenger seat belt retractor(s).

Lights and instruments

2024060 1 Feb 2024

Issue: On certain vehicles, a software problem could cause the lower beam headlamps not to turn on as it becomes dark outside if the multi-function switch is in the "OFF" or "PARKING LAMP" position. This could also cause the daytime running lamps (DRLs) to turn off when the vehicle is moving. As a result, the vehicles may not meet certain requirements of Canadian regulations. Safety Risk: Headlamps and/or DRLs that don't turn on could reduce visibility, make the vehicle less visible to others and increase the risk of a crash. Corrective Actions: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to update the body control module (BCM)software.
