5 recalls listed by Transport Canada for this model year

Airbag

2017342 10 Jul 2017

On certain vehicles, the sensing and diagnostic module (SDM), which controls airbag and pretensioner deployment, contains a software defect which may prevent the deployment of frontal airbags and pretensioners in certain circumstances. Failure of frontal airbags and seatbelt pretensioners to deploy in a crash (when warranted) could increase the risk of injury. Correction: Dealers will reflash the SDM with new software. In vehicles with any previous deployment events recorded in the SDM, the dealers will replace the existing SDM with a new SDM containing the latest software.

Airbag

2016439 9 Sep 2016

On certain vehicles, the sensing and diagnostic module (SDM), which controls airbag and pretensioner deployment, contains a software defect which may prevent the deployment of frontal airbags and pretensioners in certain circumstances. Failure of frontal airbags and seatbelt pretensioners to deploy in a crash (when warranted) could increase the risk of injury. Correction: Dealers will reflash the SDM with new software. In vehicles with any previous deployment events recorded in the SDM, the dealers will replace the existing SDM with a new SDM containing the latest software. Note: This recall affects 2014-2017 model year Sierra LD/Silverado LD models and 2015-2016 model year Sierra HD/Silverado HD model vehicles.

Suspension

2015023 22 Jan 2015

On certain vehicles, the right rear toe link outer ball joint may not have been properly fastened to the knuckle. This may result in rear suspension noise, particularly when travelling around corners or over bumps or potholes. Over time, if the vehicle is continually operated with this condition, the toe link could separate from the knuckle, causing sudden vehicle instability and increasing the risk of a crash causing personal injury or property damage. Dealers will inspect and replace any damaged parts as necessary. If no damage is noted, the dealer will reassemble the toe link with a new fastener and tighten to specification.

Airbag

2014407 18 Sep 2014

On certain vehicles, a defect in the driver frontal airbag could allow the airbag to separate from its backing plate upon deployment, increasing the risk of injury to the seat occupant in a crash where airbag deployment is warranted. Correction: Dealers will replace the airbag.

Brakes

2014405 18 Sep 2014

Certain vehicles fail to comply with the requirements of Canada Motor Vehicle Safety Standard 135 - Brake Systems. One of the parking brake cables may not have been installed correctly, which would result in the parking brake being operational on one rear wheel only, causing a reduction in parking brake performance and causing the vehicle to fail to meet the requirements of the standard. This could result in unintended vehicle movement, increasing the risk of a crash causing injury and/or property damage. Correction: Dealers will inspect, and if necessary, re-install the park brake cable.

> Listed for the model year, not checked against your VIN. Chevrolet confirms which apply.

§5 DOCUMENTS

Window sticker — This VIN reads as model year 1985 or 2015, before our coverage for this manufacturer.

SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] NHTSA recall records (United States), listed for the model year
[4] Cardog market quote, same model year, 11 live listings, as of 29 Oct 2026
[5] Live public dealer listings on Cardog, as of 29 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
