**2** recalls listed by Transport Canada for this model year

### Seats and restraints

2015187 7 May 2015

On certain vehicles, the flexible steel cable that connects the seat belt to the vehicle structure at the front outboard seating positions can fatigue over time and could separate, increasing the risk of injury in a crash. Correction: Dealers will replace the outboard lap anchor mounting bracket to relocate the tensioner 30mm rearward and inspect and repair or replace the lap pretensioner, as necessary.

### Electrical

2014173 16 May 2014

On certain vehicles, intermittent electrical connection faults may cause the brake lamps to illuminate without the brake pedal being depressed, or not illuminate when the brake pedal is depressed. This could also interfere with cruise control, ABS and/or vehicle stability control function. Failure of the brake lights to illuminate when the brake pedal is depressed or erratic brake lamp function could increase the risk of a crash causing property damage and/or personal injury. Correction: Dealers will affect repairs.

## STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
