Seats and restraints

2021522 20 Aug 2021

Issue: On certain vehicles, a bolt that attaches the rear seat belt retractor(s) may be missing. As a result, the seat belt may not work as designed in a crash. Note: On Chevrolet Malibu models, the right rear seat belt could be affected. On Cadillac XT4 models, both the left and right rear seat belts could be affected. Safety Risk: A seat belt that does not work properly could increase the risk of injury in a crash. Corrective Actions: General Motors will notify owners by mail and instruct you to take your vehicle to check that the rear seat belt retractor bolts are properly installed. The dealer will replace or tighten the bolt(s), as required.

Airbag

2018322 15 Jun 2018

On certain vehicles that had the front passenger presence system (PPS) replaced, the replacement parts may have been incorrectly calibrated. This could cause the PPS not to properly identify certain children and small adults seated in the front passenger seat. If the vehicle was involved in a crash, this could cause the airbag to deploy when it should not, or could cause the airbag not to deploy when it should. Either of these outcomes could increase the risk of injury to the seat occupant. Correction: Dealers will replace the front PPS.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
