cardog.app/tools/recalls/cadillac/srx/2012

3 recalls listed by Transport Canada for this model year

Suspension — 2021394 — 24 Jun 2021

Issue: On certain vehicles, the adjustable rear toe link may not have been properly tightened during a previous service repair. As a result, the toe link could loosen and eventually separate. This could cause a sudden loss of vehicle stability. Note: You may notice the following warning symptoms if a rear toe link is loose: - sway or wander while driving; - loud metallic or other unusual noise from the rear suspension; - the steering wheel may be off-center; - the Stabilitrak malfunction indicator lamp (MIL) may stay on or flash while driving; - Uneven wear between the rear tires. If you detect these symptoms, you should stop driving and have the vehicle towed to the nearest dealership. Safety Risk: A loss of stability could increase the risk of a crash. Corrective Action: General Motors will notify owners by mail and instruct you to take your vehicle to a dealer to replace the adjustable rear toe links with a newly designed part.

Suspension — 2014406 — 18 Sep 2014

On certain vehicles, the rear suspension toe link jam nuts may not have been tightened to specification. If the vehicle is operated in this condition, the toe link nuts could loosen and eventually separate, allowing the rear wheel to turn inboard or outboard. If this were to happen, sudden changes in vehicle handling could occur, which could result in a crash causing injury and/or property damage. Correction: Dealers will inspect and ensure the rear suspension toe link nuts are tightened to specification. If required, the rear suspension toe link will be replaced.

Seats and restraints — 2014311 — 23 Jul 2014

On certain vehicles equipped with power height adjustable front seats, a bolt securing the adjuster mechanism may loosen and fall out. This would cause the seat to drop to the lowest vertical adjustment position, which could affect the driver's ability to safety operate vehicle controls as well as cause reduced driver visibility. These issues could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the bolt.

§5 DOCUMENTS

Window sticker This VIN reads as model year 1982 or 2012, before our coverage for this manufacturer.

SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] NHTSA recall records (United States), listed for the model year
[4] Cardog market quote, same model year, 4 live listings, as of 27 Oct 2026
[5] Live public dealer listings on Cardog, as of 27 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
