Body	Sedan	Plant	Lansing - Grand River, Michigan, United States

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/cadillac/cts/2014

9 recalls listed by Transport Canada for this model year

Steering

2020291 25 Jun 2020

Issue: On certain vehicles, the bolts that attach the electric power steering assist motor to the steering gear may corrode and break. This could cause a loss of power steering assist. Safety Risk: A loss of power steering assist may result in a sudden increase in steering effort, especially at low vehicle speeds. This could increase the risk of a crash. Corrective Actions: General Motors will notify owners by mail and instruct you to take your vehicle to a dealer to replace the bolts that attach the electric power steering motor and apply a protective wax coating. If the bolts cannot be removed due to corrosion, the steering gear will be replaced.

Powertrain

2020020 23 Jan 2020

Issue: On certain vehicles, the roll pins in the rear axle differential could fatigue and break over time. This could cause the rear wheels to lock up. Safety Risk: If this occurs while the vehicle is being driven, it could increase the risk of a crash. Corrective Actions: General Motors will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the rear axle differential. It will be repaired or replaced as necessary.

Electrical

2018481 7 Sep 2018

On certain vehicles equipped with heated front seats, the seat heating element may become damaged, causing localized over-heating. In a situation where the vehicle is started remotely and the heated seats are turned on, the seat could over-heat and melt, creating an increased risk of a fire causing injury and/or damage to property. Correction: Dealers will reprogram the body control module to deactivate the heated seat function when the vehicle is started remotely.

Steering

2018463 30 Aug 2018

On certain vehicles originally sold or currently registered in areas of heavy road salt usage during winter months (Ontario, Quebec, New Brunswick, Nova Scotia, Prince Edward Island, and Newfoundland & Labrador), the bolts that attach the electric power steering assist motor to the steering gear housing may corrode and break. This could cause a loss of power steering assist. The resulting increase in steering effort could create the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the mounting bolts and apply a corrosion protection coating to the gear housing and bolts. If the bolts bolt cannot be removed, a replacement steering gear will be installed.

Electrical

2014432 3 Oct 2014

On certain vehicles, the chassis electronic module may have been contaminated at time of manufacture, which could cause an electrical short to occur within the module. This could cause the vehicle's check engine light to be displayed, or cause the engine to fail to start or stall, resulting in a loss of motive power. If the vehicle is equipped to support electric trailer brakes, the vehicle could also lose trailer brake function and display a "Service Trailer Brake System" indicator. These issues could increase the risk of a crash resulting in injury and/or damage to property. Correction: Dealers will replace the module with a revised part.

Seats and restraints

2014315 29 Jul 2014

On certain vehicles, the hook bracket assembly for either front seat may have been manufactured with an incomplete weld. If the weld is incomplete and the assembly is exposed to a high load condition, the hook may separate from the seat track. This could increase the risk of occupant injury during a crash. Correction: Dealers will inspect the weld, and if necessary, replace the lower seat track.

§5 DOCUMENTS

Window sticker — This VIN reads as model year 1984 or 2014, before our coverage for this manufacturer.

SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] NHTSA recall records (United States), listed for the model year
[4] Cardog market quote, same model year, 5 live listings, as of 28 Oct 2026
[5] Live public dealer listings on Cardog, as of 29 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
