3 recalls listed by Transport Canada for this model year

Visual system — 2024389 — 2 Jul 2024

Issue: On certain vehicles, air bubbles could appear in the lower-left area of the windshield glass. As a result, the vehicle identification number (VIN) may be difficult to see through the glass. Safety Risk: This problem could cause confusion when trying to identify the vehicle using the VIN. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the windshield.

Powertrain — 2024254 — 29 Apr 2024

Issue: On certain vehicles, the left-front axle shaft may not have been installed properly. As a result, the axle shaft could separate from the transmission and cause a sudden loss of power to the wheels. Additionally, if the vehicle is parked and the parking brake isn't applied, the vehicle could roll away. Safety Risk: An unexpected loss of power to the wheels could increase the risk of a crash. A parked vehicle that moves suddenly could create a risk of a crash or an injury. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the left-front axle shaft and the transmission.

Airbag — 2024129 — 27 Feb 2024

Issue: On certain vehicles, the driver-front airbag may not have been manufactured properly. Over time, moisture could enter the inflator and cause it not to inflate properly in a crash. Safety Risk: An airbag that doesn't inflate properly could increase the risk of injury in a crash. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to replace the driver-front airbag.
