**2** recalls listed by Transport Canada for this model year

### Fuel system

2025544 9 Oct 2025

Issue: On certain vehicles, the fuel tank temperature (FTT) sensor harness could become damaged by contact with the fuel pump connector and could short circuit. If this happens, the fuel pump fuse could blow and cause the engine to stall while driving. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Action: General Motors will notify owners by mail and advise you to take your vehicle to a dealership to inspect and reroute the FTT harness or replace the fuel pump assembly, as necessary.

### Airbag

2016196 3 May 2016

On certain vehicles, a defect in the occupant classification system could allow an adult sitting in the front passenger seat to be classified as a child or an “empty seat”. This would suppress the airbag, which could increase the risk of injury in a crash. Correction: Dealers will replace the occupant classification system electronic control unit.

## STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
