2 recalls listed by Transport Canada for this model year

Fuel system

2025543 9 Oct 2025

Issue: On certain vehicles, the fuel tank temperature (FTT) sensor harness could become damaged by contact with the fuel pump connector and could short circuit. If this happens, the fuel pump fuse could blow and cause the engine to stall while driving. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Action: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to inspect and reroute the FTT harness or replace the fuel pump assembly, as necessary.

Visual system

2019459 13 Sep 2019

Issue: On certain vehicles, the rear view camera system does not return to the default setting when the transmission is shifted to reverse. This could cause a reduction in rear visibility if a driver had previously adjusted the camera display. Canadian regulations require that the rear view image returns to its original setting each time the camera is turned on. Safety Risk: Reduced rear visibility could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and instruct them to take their vehicle to a dealer to update the software for the rear view camera.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
