2 recalls listed by Transport Canada for this model year

Airbag 2017494 12 Oct 2017

On certain vehicles, there could be an electrical condition within the Occupant Restraint Control ("ORC") module. This may result in the airbag warning lamp illuminating, and the active head restraints not to deploy during certain rear impact collisions, which could increase the risk of injury to front seat occupants. Correction: Dealers will inspect the ORC part number and replace the ORC if necessary. Note: Vehicles that have been previously repaired with the updated ORC under recall 2016-448 will not require repairing under this recall campaign.

Airbag 2013231 4 Jul 2013

On certain vehicles, the airbag warning lamp may illuminate due to an electrical fault within the Occupant Restraint Control (ORC) module. As a result, the Active Head Restraints (AHR) may not deploy during a rear impact collision (where deployment is warranted), which could increase the risk of personal injury to the front seat occupants. Correction: Dealers will reprogram the Totally Integrated Power Module (TIPM) or replace the ORC module, as required.
