3 recalls listed by Transport Canada for this model year

Airbag

2018523 27 Sep 2018

On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, could eventually degrade the propellant contained in the passenger frontal airbag. This could cause the airbag to deploy with more force than normal. As a result, if the vehicle were involved in a collision that warrants airbag deployment, fragments could be propelled toward vehicle occupants, and the airbag assembly could be damaged, preventing proper function. These issues could increase the risk of injury. Correction: Dealers will replace the passenger frontal airbag inflator.

Airbag

2016032 25 Jan 2016

On certain vehicles, over time, moisture could enter the Supplemental Restraint System (SRS) controller and could cause a fault in the airbag system. This could result in the airbag controller becoming inoperative, which would prevent the airbag(s) from deploying. Failure of an airbag to deploy during a crash (where deployment is warranted) could increase the risk of personal injury to the seat occupant. Correction: Dealers will replace the SRS control module. Note: This condition would cause the illumination of the SRS warning light. Note: This recall supersedes recall 2015-473. Vehicles repaired under the previous recall will require re-inspection and repair.

Powertrain

2011286 5 Aug 2011

On certain vehicles, the secondary shaft bearing in the automatic transmission may fail. This could cause abnormal noise, the malfunction indicator lamp to turn ON, and allow contact between the transmission idle gear and an electronic sensor housing within the transmission, resulting in a short circuit that causes the engine to stall. Engine stalling would result in lost vehicle propulsion which, in conjunction with traffic and road conditions, and the driver's reactions, could increase the risk of a crash. Additionally, broken pieces may become lodged in the parking pawl resulting in the vehicle rolling after the driver has placed the gear selector in the PARK position. These issues could result in property damage and/or personal injury. Correction: Dealers will update the automatic transmission control module software.

Window sticker We do not collect window stickers for this manufacturer.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same model year, 10 live listings, as of 28 Oct 2026

[5] Live public dealer listings on Cardog, as of 28 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
