2 recalls listed by Transport Canada for this model year

Powertrain

2020609 10 Dec 2020

Issue: On certain vehicles, the paint on the front axle shafts could delaminate or become damaged by road debris. As a result the axle shaft could corrode. If this happens, the axle shafts could break and cause a loss of power to the wheels. Also, if this happens and the vehicle is parked without the parking brake applied, the vehicle could roll away. Safety Risk: A loss of power to the wheels or a vehicle rollaway could increase the risk of a crash. Corrective Actions: Honda will notify owners by mail and instruct you to take your vehicle to a dealer to inspect, and if necessary, replace both axle shafts.

Electrical

2017327 30 Jun 2017

On certain vehicles, the case for the battery sensor may have been improperly manufactured with gaps that could allow for moisture intrusion. If moisture or road salt were to enter the battery sensor case, it could result in corrosion to the sensor, which could cause an electrical short, increasing the risk of a fire causing injury and/or property damage. Correction: Dealers will inspect, and replace the battery sensor as necessary.
