2 recalls listed by Transport Canada for this model year

Suspension

2021350 28 May 2021

Issue: On certain vehicles, the rear axle housings may not have been properly heat-treated. As a result, a strong impact (such as hitting a curb) could cause a rear axle housing to bend or break. If this happens, a wheel could be mis-aligned or there could be a loss of control and a wheel could separate. Safety Risk: A loss of control and/or a wheel separation could increase the risk of a crash. A wheel that separates could also hit another person or vehicle. Corrective Actions: Nissan will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the production date on the casting stamp of the rear axle housings. Parts that are affected by this problem will be replaced.

Suspension

2021144 15 Mar 2021

Issue: Certain vehicles may have been assembled with defective front lower control arms (transverse links). As a result, the outer ball joint could separate from the arm and cause a loss of vehicle control. Safety Risk: A loss of vehicle control could increase the risk of a crash. Corrective Actions: Nissan will notify owners by mail and instruct you to take your vehicle to a dealer to inspect and, if necessary, replace the defective front transverse links.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
