**2** recalls listed by Transport Canada for this model year

### Visual system

2025656 26 Nov 2025

Issue: On certain vehicles, a software problem could cause infotainment system display to remain blank when the vehicle is started. As a result, when the transmission is shifted into reverse gear, the rearview camera image would not appear on the display. Note: This recall only affects certain trim levels. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and advise you to take your vehicle to a dealership to update the infotainment system software.

### Brakes

2025148 20 Mar 2025

Issue: On certain vehicles, the front brake calipers may not have been manufactured correctly. As a result, the caliper(s) could crack and cause reduced braking. Safety Risk: Reduced braking could cause extended stopping distances and increase the risk of a crash. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace front brake caliper(s).

Listed for the model year, not checked against your VIN. Nissan confirms which apply.

## STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
