3 recalls listed by Transport Canada for this model year

Other — 2026238 — 19 May 2026

Issue: On certain vehicles, a software problem with the front camera could cause the forward collision avoidance (FCA) system to apply the vehicle's brakes suddenly. Note: For the Tucson model, this recall affects gas, hybrid (HEV) and plug-in hybrid (PHEV) models. Safety Risk: A vehicle that brakes suddenly when there's no risk of a collision could increase the risk of a crash. Corrective Actions: Hyundai will notify owners in writing and advise you to take your vehicle to a dealership to update the front camera software.

Airbag — 2025646 — 20 Nov 2025

Issue: On certain vehicles, the side curtain airbags may not have been installed properly. As a result, the airbag(s) may not inflate properly in a crash. Safety Risk: A side curtain airbag that doesn't work properly could increase the risk of injury in a crash. Corrective Actions: Hyundai will notify owners by mail and advise you to take your vehicle to a dealership to reinstall the side curtain airbags properly.

Electrical — 2024708 — 20 Nov 2024

Issue: On certain vehicles, the wiring for the center console extension may not have been routed properly. As a result, the wiring could contact the release for the shift lever lock. If this happens, the transmission could be shifted out of the Park (P) position without pressing the brake pedal. Safety Risk: A vehicle that moves suddenly could create the risk of an injury or a crash. Corrective Actions: To reduce the safety risk, Hyundai recommends that you should always use the parking brake when you park. Hyundai will notify owners in writing and advise you to take your vehicle to a dealership to reroute the center console extension wiring.
