2 recalls listed by Transport Canada for this model year

Lights and instruments

2019242 23 May 2019

Issue: Certain vehicles were built with headlights that may allow horizontal adjustment. This is not allowed under Canadian regulations. Safety Risk: Headlights that are not properly adjusted could cause reduced visibility or glare for oncoming drivers, and could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and instruct them to take their vehicle to a dealer to inspect the headlights. A blocking cap will be installed on the horizontal adjusters as necessary.

Brakes

2017056 8 Feb 2017

On certain vehicles, defective brake line connections could cause brake fluid to leak from connection points. Over time, this would cause the brake fluid level in the master cylinder reservoir to become low, illuminating the low fluid level warning light. If the vehicle is operated in this condition, reduced brake function may result, extending stopping distances and increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace affected brake lines.

> Listed for the model year, not checked against your VIN. Volkswagen confirms which apply.

SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] NHTSA recall records (United States), listed for the model year
[4] Cardog market quote, same model year, 14 live listings, as of 27 Oct 2026
[5] Live public dealer listings on Cardog, as of 27 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
