**3** recalls listed by Transport Canada for this model year

### Label

2024544 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

### Seats and restraints

2022501 7 Sep 2022

Issue: On certain vehicles, the springs that lock the backrest for the third-row seat may not have been installed correctly. As a result, the seat backrest may not fully lock in place. Safety Risk: A seat backrest that isn't locked could move in a crash and increase the risk of injury. Corrective Actions: BMW will notify owners by mail and instruct you to take your vehicle to a dealership to inspect the third-row seat and reinstall the compression springs, as necessary. To reduce the safety risk, BMW recommends that you should not transport any passengers in the third-row seat until the recall repairs have been completed.

### Structure

2022202 20 Apr 2022

Issue: On certain vehicles, a software problem could allow you to close the sunroof remotely without the key fob inside the vehicle. Canadian regulations require the key fob to be in or near the vehicle when closing the sunroof. Safety Risk: A sunroof that can be closed without the key fob in or near the vehicle could create a risk of injury. Corrective Actions: BMW will notify owners by mail and instruct you to take your vehicle to a dealership to reprogram the roof function control unit. Alternatively, you can download an over-the-air update to fix this problem.
