6 recalls listed by Transport Canada for this model year

Label

2024544 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Airbag

2021419 8 Jul 2021

Issue: On certain vehicles, the seat trim may not be properly attached to the front passenger seat. Over time, this could cause the occupant classification system (OCS) not to work properly. If this happens, the airbag system can turn off the passenger-front airbag even when an adult is sitting in the seat. Safety Risk: In a crash where an airbag is required, an airbag that does not inflate could increase the risk of injury for an adult passenger. Corrective Action: BMW will notify owners by mail and instruct you to make an appointment with a dealer to replace the front passenger seat cushion (including the occupant classification system).

Visual system

2019480 1 Oct 2019

Issue: On certain vehicles, the rearview camera does not return to the default settings when it turns on. This could make the rearview image difficult to see if a driver had previously adjusted the camera display brightness at or near the lowest setting, and contrast at or near the highest setting. Canadian regulations require that the rearview display returns to the default view each time the camera is turned on. Safety Risk: Reduced rear visibility could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and instruct them to take their vehicle to a dealer to update the software for the rearview camera. Drivers are recommended not to adjust the display brightness at or near the lowest setting, and contrast at or near the highest setting, until this recall is completed.

Airbag

2019177 11 Apr 2019

Issue: On certain vehicles, the instrument trim panel could cause the passenger-front airbag not to deploy properly in a crash. Safety Risk: A passenger-front airbag that does not work properly could cause increased injuries in a crash. Corrective Actions: BMW dealers will replace the instrument trim panel prior to vehicle sale.

Engine

2018497 13 Sep 2018

On certain vehicles, a crankshaft sensor error may cause the engine to stall. This would result in a loss of motive power, which could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the crankshaft sensor. Note: This condition would result in the illumination of the check engine warning lamp and an “engine malfunction” message appearing in the instrument cluster. Note: This is an expansion of recall 2018-373.

Brakes

2018366 6 Jul 2018

On certain vehicles, a problem with the rear brake system may cause gas bubbles to form in the brake fluid. This could cause a soft brake pedal feel and a reduction in brake performance, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will bleed the rear brakes.
