**3** recalls listed by Transport Canada for this model year

### Label

2024548 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

### Visual system

2020145 6 Apr 2020

Issue: On certain vehicles, the rearview camera image may be displayed even after the transmission is shifted out of reverse. This could cause a possible distraction for the driver. Canadian regulations require the rearview image to turn off within 10 seconds after shifting from reverse gear. Safety Risk: A driver that is distracted could have an increased risk of a crash. Corrective Actions: FCA Canada will notify owners by mail and instruct you to take your vehicle to a dealer to update the radio software.

### Lights and instruments

2019137 15 Mar 2019

Issue: On certain vehicles, the instrument cluster may not work. Safety Risk: An instrument cluster that does not work may prevent an operator from receiving information regarding the status of vehicle systems. This could increase the risk of a crash. Corrective Actions: The company will notify owners by mail. Owners will be instructed to take their vehicle to a dealer to have the instrument cluster software updated.
