On certain vehicles equipped with the Roadside Emergency Kit containing a Kidde fire extinguishers with black plastic handles and valves, the fire extinguishers may become clogged or require excessive force to activate. Also, the nozzle may detach from the valve assembly with enough force that it could cause injury, and fail to discharge. In case of fire, failure of the extinguisher to function could result in injury and/or property damage. On certain Amerivan 10 wheelchair accessible vehicles built on Dodge Grand Caravan and Chrysler Town and Country platforms, the crimp fasteners used to retain fittings in the fuel line may not be fully crimped or compressed. This could result in a fuel leak. Leaking fuel, in the presence of an ignition source, could lead to a fire causing injury and/or damage to property. Correction: Dealers will inspect fasteners and crimp the fasteners further to ensure they are fully compressed and seated.

Powertrain — 2016306 — 14 Jun 2016

On certain vehicles, a defect may cause the transmission pump rotor to seize or break, resulting in a loss of transmission pressure. This could result in a loss of motive power which, in conjunction with traffic and road conditions, and the driver's reactions may increase the risk of a crash causing injury. Correction: dealers will replace the transmission pump assembly.

Brakes — 2016130 — 23 Mar 2016

On certain vehicles, the left front brake caliper may have been cast from an incorrect material during manufacturing. This could cause the brake caliper to possibly crack under an extreme braking application. This could affect vehicle control and increase stopping distances, which could increase the risk of a crash causing injury and/or property damage. Correction: Dealers will inspect the front left caliper date code and replace the caliper if it is from the suspect casting date.
