2 recalls listed by Transport Canada for this model year

Powertrain

2014280 3 Jul 2014

On certain vehicles, the right-side halfshaft retention clip may not have been fully engaged, and could allow the halfshaft to separate. If this were to occur while the vehicle is being driven, it could result in a loss of motive power. If this were to occur while the vehicle is parked on an incline without the parking brake applied, it could result in unintended vehicle movement. Both situations could increase the risk of a crash causing injury and/or property damage. Correction: Dealers will inspect halfshafts for full retention and affect repairs as necessary.

Fuel system

2014001 2 Jan 2014

On certain vehicles equipped with a 2.0L engine, the fuel line pulse damper may have been manufactured incorrectly and could develop cracks. Fuel leakage, in the presence of an ignition source, could result in a fire causing property damage and/or personal injury. Correction: Dealers will replace the fuel line assembly. Note: This recall supersedes recall 2012-299 (12S40). Vehicles that were repaired under the previous campaign will also need to be repaired under this campaign.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
