Visual system

Issue: On certain vehicles, a software problem could cause the rearview camera image not to display when the transmission is shifted into reverse. Canadian regulations require the rearview image to display when the vehicle is reversing. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the SYNC software.

Seats and restraints

2019537 25 Oct 2019

Issue: On certain vehicles, the driver's seat belt pretensioner anchor may not have been crimped properly. This could cause the seat belt to separate in a crash. Safety Risk: A seat belt that separates in a crash could increase the risk of injury. Corrective Actions: Ford will notify owners by mail and instruct them to take their vehicle to a dealer to inspect the driver's seat belt pretensioner assembly. It will be replaced as necessary.
