Issue: Under certain conditions, the infotainment system could overheat. As a result, the rearview camera image may not display when the transmission is shifted into reverse. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the accessory protocol image module (APIM) software.
